

God in Two Minutes

by Prem Kamble

<http://premkamble.com>

About the Seminar

Prem's talk is based on his book "God in Two Minutes" which looks at God and religion in a completely new light as has never been done before. This talk may challenge some of your fundamental beliefs, so it is his humble request to come with an open mind. The book can be downloaded at Amazon at <http://bit.ly/godin2min>.

The topic of Religion is very relevant to this time when religious fanaticism has shaken the world. Prem addresses the fundamental causes which have led to the great religious divide. This talk can help root out religious fanaticism from this world and make the world a much better place to live in. He explores how the concept of God and religion may have originated with noble intentions and how we have misunderstood it to divide ourselves. He has found the root cause of this debacle - a basic flaw in the 'method' of God and Religion which has prevented it from achieving its noble objective. He believes that it is important for every human being to be aware of this flaw. According to him,

the concept of God and religion is a method devised ages ago for spiritual pursuits. The problem is that it is a "bullock cart" method and has not evolved to a "jet-age" method because of this inherent flaw which has stopped mankind from from "thinking beyond".

"I can foresee a world united again, a world where man will not be divided by religion. Religion will be 'scientifically' explained and we will see that there is only one 'God' who is within each one of us. Man will see his folly"

Prem believes that man *will* break free from this trap and devise a new method. He introduces a concept which he has named as "**Mentomatics**" which will give us the jet-age method to attain "**God in two minutes**". Just as Mathematics gave birth to Physical science and ushered in the Industrial and Information revolutions, Mentomatics will usher in the next big revolution – **the Spiritual revolution**. The laws of Spiritual world will be explained.

The talk gives a sneak-peek into this future.

Though he uses the basics of physical science in his talk, what you will hear is not science, not religion nor heavy philosophy. It is plain and simple common sense.

The book is an "**eye-opener**" based on very original thoughts never written before. The views on God and religion, though consistent with all religions, can be contrary to common beliefs. So be ready for a healthy debate.

Why this Seminar?

Why is this talk important to you and every human being? Most would say, "I am very open minded. I am not against other religions, so I do not do any harm to the world when I follow my faith and my religion". Do you know that your very private beliefs too contribute to dividing the world? Do you know that YOU need to do something about this Great Religious Divide? If you love your children and wish

a better future for your children, **YOU NEED TO WAKE UP AND ACT NOW.**

Prem's talk will help you open your eyes.

About Prem Kamble

Prem is a Computer Professional with MBA from IIM Calcutta and B.Tech. from IIT Bombay. He has passed Advanced Management course called "Energo Cybernetic Strategy" with flying

colors from Germany. He has also attended self-development programs like Est, Forum, Advanced Course, SELP (Self Expression & Leadership Program), etc. organized by Landmark Education Foundation, USA which have helped him to develop a broader outlook and a different way of thinking.

He has been heading IT function for over 25

years. During his career mostly as a CIO and Software Delivery Professional, he has been a keen student of Change Management, particularly the people and psychological issues of Management.

“A time will come when man will look back and say ‘Once upon a time, there lived barbarians on this earth who believed in several Gods, and they killed their fellow beings in the name of religion’”

He has worked both as Software Delivery head in SEI Level 5 companies and as Head of IT (CIO) in manufacturing companies.

He started his career as an analyst/programmer and in less than five years was heading the IT function for a group of companies. His areas of interest are business and human aspects of Information Technology.

What is Unique?

Prem's talk is based on his US Copyright book which has absolutely original and revolutionary thoughts that you would not have read anywhere so far.

What makes this presentation unique compared to most of the seminars is his 'out-of-the-box' thinking and a knack to see what is not so obvious. This skill is amply demonstrated in his various articles and blogs.

Who Should Participate?

This seminar is for the common man. It is important for men and women of all ages and all faiths. There is no pre-qualification, except an open mind.
